PROFILE

Early-career developer building web applications and data workflows with inspectable sources, explicit failure handling and reproducible checks. Seeking backend or full-stack roles. Previous experience in logistics and team coordination.

SELECTED PERSONAL PROJECTS

Relay - Job Evidence Desk | Python, FastAPI, React, TypeScript, MCP

Read-only job-listing research through a browser and MCP clients. Exact source quotes, canonical-URL deduplication, changed-text retention and Markdown/JSON export. Tests cover validation, source handling and MCP transports. Literal matching, not AI eligibility scoring.
Live workspace · Source

Pattern Forge - Market Replay | TypeScript, React, Next.js

Recorded metals, index and crypto perpetual markets alongside public Hyperliquid snapshots. Prefix-only replay avoids exposing future candles to analysis; tests cover candle validation, aggregation and indicators. A research tool, not a trading recommendation.
Live workspace

Transcript Desk | JavaScript, browser APIs

Search TXT/SRT/VTX transcripts, manually select timestamped quotes and export source-backed briefs. Local-only processing, input validation and portable workspace restore. Public app does not transcribe audio or generate AI summaries.
Live workspace

Polybow - Trading-System Postmortem | Python, CSV, event analysis

Reconstruct live prediction-market activity from an anonymized ledger using reproducible analysis and validation tests. Document cash-flow assumptions, risk concentration and the complete negative outcome; no profitability claim.
Case study

TECHNICAL SKILLS

Python · TypeScript/JavaScript · SQL · Ruby on Rails · React · FastAPI · Node.js
PostgreSQL · REST APIs · MCP · Git · Docker · Automated tests

PREVIOUS EMPLOYMENT

De Bommel / DHL - Webshop order processing | 2025

Prepared customer orders for dispatch, following warehouse and shipping procedures.

Home Fundraiser Ltd, London - Team Leader & Planner | 2017

Coordinated daily team activities, planning and communication.

TRAINING

Le Wagon, Barcelona - Full-stack development training, 2023.
