Portfolio | GitHub | LinkedIn

SKILLS

Languages & web

Python, JavaScript/TypeScript, Ruby, SQL, HTML/CSS

Application development

React, Next.js, Ruby on Rails, FastAPI, Node.js, Hotwire

Data & integration

PostgreSQL, SQLite, REST APIs, WebSockets, MCP, JSON/JSONL

Engineering

Git, Docker, GitHub Actions, automated tests, debugging, documentation

Development workflow

AI-assisted implementation, code review and verification

LANGUAGES

Spanish - Native

English - C2

Catalan - B1

Dutch - A1

Curiosity comes first: I want to understand how something actually works before I try to change it. Then I break the problem into something I can test. I use current AI tools to explore and implement, and I review the result myself. I also keep up with the tools that appear every week, so the way I work can change when a better method shows up.

EXPERIENCE

De Bommel

E-commerce dispatch · Ceyenne software and DHL | 2025

- Used Ceyenne software (WMS) to record inbound and outbound furniture orders: quantities, boxes and shipment records.
- Prepared DHL despatches from that flow, booked inbound trucks by phone, and signed transport documents so the file matched what left the dock.

Barcelona–El Prat Airport

IAS Handling · Air cargo operations · WMS software | 2019–2020

- Worked in the bonded cargo warehouse on the airport: cargo aircraft offloaded on the ramp straight into the store. Airside access, not a city warehouse.
- Used WMS software to check customs permits and documentation so freight could be released and moved on. A missing paper stopped the load.
- Kept inbound and outbound records aligned with the physical cargo: references, inspections and releases under customs control (depósito aduanero).

Transjunior Logistics

Road-freight office · WMS software | 2018

- Used WMS software to track inbound and outbound orders and truck movements, and to coordinate the day's road schedule from the desk.

Home Fundraiser Ltd, London

Route planner | 2016–2017

- Planned daily area assignments and routes for field fundraising teams.

Amplify Trading

Futures trading | 2016

- Traded futures on an Amplify live account after the training programme.
- Used technical and fundamental analysis to form a view, then checked it against order flow on the live book.
- Worked with futures contract mechanics — expiry, tick size and how a live book behaves.

PROJECTS

Pattern Forge — Market-data API and replay that cannot use later prices.

Relay — One evidence service behind a web UI and MCP tools.

Polybow — Live Python system on AWS Lightsail, then ledger work after it stopped.

More challenges and course work: [coder058.github.io/profile/#more-challenges](https://github.com/coder058/profile/#more-challenges)

EDUCATION & TRAINING

Further learning | 2024–present

Anthropic and OpenAI online courses. Ongoing work with current AI tools.

Le Wagon, Barcelona | Full-stack development | 2023

Ruby, Rails, JavaScript, PostgreSQL, HTML/CSS and Git.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016. Futures, markets and applied finance.

Instituto de Sonido de Caracas | Sound Engineering | 2015–2016
