I build inspectable web tools: clear data boundaries, documented trade-offs and tests around failure paths. Public code and walkthroughs are on coder058.github.io/profile.

SELECTED ENGINEERING WORK

Pattern Forge

Built market replay that recalculates indicators from available candles only. Tests exclude incomplete timeframes and future data.

Info Desk

Built versioned evidence retrieval and cited AI drafts, with tests for invalid citations and interrupted jobs. Live research runs locally; the public demo is recorded.

Relay

Exposed one Python evidence matcher through HTTP and MCP. Integration tests exercise real protocol calls and source-preserving exports.

Haystack #12635 - merged

Fixed validation rejecting zero-valued hierarchy metadata; added a regression test and release note.

EXPERIENCE

De Bommel

E-commerce dispatch · Ceyenne software and DHL | 2025
