TECHNICAL SKILLS

Languages
Ruby, Python, TypeScript, JavaScript, SQL

Application development
Rails, React, Node.js, HTML, CSS, Hotwire, Stimulus

AI and agent workflows
AI-assisted development, prompt design, MCP tooling, policy rules, trace analysis

APIs and data systems
REST APIs, WebSockets, PostgreSQL, SQLite, Active Record, JSON/JSONL pipelines

Engineering tools
Git, Docker, debugging, test design, technical documentation, Mapbox, Whisper

LANGUAGES

Spanish	Native
English	C2
Catalan	B1
Dutch	A1

RUBY ON RAILS, PYTHON, TYPESCRIPT & SQL | AI PRODUCTS, DATA SYSTEMS, AND OPERATIONAL TOOLS

Software engineer trained in full-stack development. Builds operational software, data workflows, and AI-assisted tools with an emphasis on clear interfaces, traceable decisions, and careful systems thinking.

EXPERIENCE

De Bommel · Webshopper (DHL) · 2025
Prepared and processed online customer orders from the De Bommel webshop for DHL dispatch, following warehouse and shipping procedures.

Home Fundraiser Ltd, London · Team Leader & Planner · 2017
Coordinated team planning, daily activities, and communication in a target-driven field operation.

Transjunior Logistics · Inbound & Outbound Logistics · Earlier experience
Worked across inbound and outbound logistics operations, supporting the movement and organisation of goods.

SELECTED PROJECTS

Relay · Local MCP safety lab
Built a FastAPI and React prototype for policy decisions, human approval, secret redaction, replay, and append-only traces. Uses safe local fixtures; it is not a production or persistent hosted system.

DispatchOps · TypeScript / React
Built a deterministic logistics simulation with an explainable, human-in-the-loop assignment agent and a responsive operational interface.

Polybow Forensics · Python / data analysis
Reconstructed 1,137 live prediction markets and reconciled 1,590 trade rows to analyse risk concentration, data quality, and missing controls. No profitability claim is made.

VÆRN and City Gardens · Ruby on Rails
Built a commerce and fulfilment system, and contributed to a team-built community-garden product with catalogue, reservation, and workflow features.

FINANCE & MARKETS TRAINING

Amplify Trading · Applied Finance · 2016
Completed live market simulations using real-time data, making time-sensitive decisions across FX pairs and equity-index futures while practising technical and fundamental analysis.

EDUCATION

Le Wagon · AI Software Development · 2023 · Barcelona

Finance & Trading Course · 2026

Instituto de Sonido de Caracas · Sound Engineering · 2015-2016

Madison School · Secondary Education · 2014

STRENGTHS

Build features end to end · translate product requirements into clear interfaces · model data and relationships · debug methodically · document decisions · collaborate in English and with remote teams.
