Portfolio | GitHub | LinkedIn

SKILLS

Languages & web

Python, JavaScript/TypeScript, Ruby, SQL, HTML/CSS

Agent tooling

MCP servers, prompt design, human review of tool output

Data & integration

PostgreSQL, SQLite, REST APIs, WebSockets, MCP, JSON/JSONL

Application development

React, Next.js, Ruby on Rails, FastAPI, Node.js, Hotwire

Engineering

Git, Docker, GitHub Actions, automated tests, debugging, documentation

Development workflow

AI-assisted implementation, code review and verification

LANGUAGES

Spanish - Native

English - C2

Catalan - B1

Dutch - A1

I build small agent-facing tools with a human still in the loop: MCP servers, quoted evidence, and tests on the protocol boundary. This is AI-assisted software work, not model training or a production RAG platform.

SELECTED PROJECTS

Relay

Four read-only MCP tools and a FastAPI service share one matcher. Mentions stay next to the source line; there is no eligibility model.

Pattern Forge

Deterministic replay and a validated API: the kind of boundary an agent should not invent.

Polybow

Post-run forensics on a live system: acknowledgements versus fills, dated recordings, unfinished later analysis.

EXPERIENCE

De Bommel

Webshop order processing / DHL dispatch | 2025

Used company software to track incoming and outgoing furniture orders, shipment and box quantities. Scheduled truck arrivals by phone, prepared inbound/outbound shipment information and DHL dispatches, and checked and signed transport documents.

IAS Handling, Barcelona-El Prat

Air cargo operations coordination | 2019

Coordinated incoming and outgoing cargo orders and checked the customs documentation and permits needed for shipment handling.

Transjunior Logistics

Logistics administration support | 2018

Tracked incoming and outgoing orders and supported office coordination of truck movements.

Home Fundraiser Ltd, London

Route Planner | 2016-2017

Planned routes and daily area assignments for field fundraising teams.

Amplify Trading

Futures trading | 2016

Traded futures using order-flow analysis on an Amplify live account after completing the training programme.

EDUCATION & TRAINING

Le Wagon, Barcelona | Full-stack development | 2023

Team project: City Gardens, Rails/PostgreSQL community gardens app. API labs: seven browser apps consuming public REST APIs.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016

Further learning | Anthropic and OpenAI online courses

Instituto de Sonido de Caracas | Sound Engineering | 2015-2016
