I sit between a messy real problem and a working integration: APIs, a tool someone else can inspect, and a live system I can debug. Python, TypeScript, MCP and a Lightsail deployment.

SKILLS

Languages: Python, JavaScript, TypeScript, Ruby, SQL, HTML, CSS.

Field-style engineering: scoping a messy problem, API integrations, inspectable evidence, live debugging.

Data and integration: PostgreSQL, SQLite, REST APIs, WebSockets, MCP, JSON/JSONL.

Agent tooling: MCP servers, prompt design, human review of tool output.

Engineering: Git, Docker, GitHub Actions, automated tests, debugging, AI-assisted development.

Applications: React, Next.js, Ruby on Rails, FastAPI, Node.js, Hotwire.

SELECTED PROJECTS

Relay

One Python evidence service behind a web UI and four read-only MCP tools, so a reviewer sees the original wording instead of a model verdict. Input validation and protocol tests.

Polybow

Operated a live Python system on AWS Lightsail: WebSocket books, CLOB integration, dated JSONL recordings, then ledger and timing analysis after the run broke.

Pattern Forge

A validated candle API and replay that keeps later prices out of earlier calculations. Failure states and a PostgreSQL restart check in CI.

EXPERIENCE

De Bommel | Webshop order processing / DHL dispatch | 2025

Used company software to track incoming and outgoing furniture orders, shipment and box quantities. Scheduled truck arrivals by phone, prepared inbound/outbound shipment information and DHL dispatches, and checked and signed transport documents.

IAS Handling, Barcelona-El Prat | Air cargo operations coordination | 2019

Coordinated incoming and outgoing cargo orders and checked the customs documentation and permits needed for shipment handling.

Transjunior Logistics | Logistics administration support | 2018

Tracked incoming and outgoing orders and supported office coordination of truck movements.

Home Fundraiser Ltd, London | Route Planner | 2016-2017

Planned routes and daily area assignments for field fundraising teams.

Amplify Trading | Futures trading | 2016

Traded futures using order-flow analysis on an Amplify live account after completing the training programme.

EDUCATION & TRAINING

Le Wagon, Barcelona | Full-stack development | 2023

Team project: City Gardens, Rails/PostgreSQL community gardens app. API labs: seven browser apps consuming public REST APIs.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016.

Further learning | Anthropic and OpenAI online courses.

Instituto de Sonido de Caracas | Sound Engineering | 2015-2016
