Portfolio | GitHub | LinkedIn

SKILLS

Languages & web

Python, JavaScript/TypeScript, Ruby, SQL, HTML/CSS

Field-style engineering

Scoping a messy problem, API integrations, inspectable evidence, live debugging

Data & integration

PostgreSQL, SQLite, REST APIs, WebSockets, MCP, JSON/JSONL

Agent tooling

MCP servers, prompt design, human review of tool output

Engineering

Git, Docker, GitHub Actions, automated tests, debugging, documentation

Application development

React, Next.js, Ruby on Rails, FastAPI, Node.js, Hotwire

LANGUAGES

Spanish - Native

English - C2

Catalan - B1

Dutch - A1

I sit between a messy real problem and a working integration: APIs, a tool someone else can inspect, and a live system I can debug. Python, TypeScript, MCP and a Lightsail deployment.

SELECTED PROJECTS

Relay

One Python evidence service behind a web UI and four read-only MCP tools, so a reviewer sees the original wording instead of a model verdict. Input validation and protocol tests.

Polybow

Operated a live Python system on AWS Lightsail: WebSocket books, CLOB integration, dated JSONL recordings, then ledger and timing analysis after the run broke.

Pattern Forge

A validated candle API and replay that keeps later prices out of earlier calculations. Failure states and a PostgreSQL restart check in CI.

EXPERIENCE

De Bommel

Webshop order processing / DHL dispatch | 2025

Used company software to track incoming and outgoing furniture orders, shipment and box quantities. Scheduled truck arrivals by phone, prepared inbound/outbound shipment information and DHL dispatches, and checked and signed transport documents.

IAS Handling, Barcelona-El Prat

Air cargo operations coordination | 2019

Coordinated incoming and outgoing cargo orders and checked the customs documentation and permits needed for shipment handling.

Transjunior Logistics

Logistics administration support | 2018

Tracked incoming and outgoing orders and supported office coordination of truck movements.

Home Fundraiser Ltd, London

Route Planner | 2016-2017

Planned routes and daily area assignments for field fundraising teams.

Amplify Trading

Futures trading | 2016

Traded futures using order-flow analysis on an Amplify live account after completing the training programme.

EDUCATION & TRAINING

Le Wagon, Barcelona | Full-stack development | 2023

Team project: City Gardens, Rails/PostgreSQL community gardens app. API labs: seven browser apps consuming public REST APIs.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016

Further learning | Anthropic and OpenAI online courses

Instituto de Sonido de Caracas | Sound Engineering | 2015-2016
