Portfolio: coder058.github.io/profile | GitHub: github.com/coder058

I build tools that turn inconsistent source records into data people can inspect. Projects cover energy feeds, time-series replay and order reconciliation, with checks for missing records and mismatched timestamps. My background includes futures trading and logistics.

SKILLS

Languages: Python, SQL, TypeScript, JavaScript.

Data and integration: PostgreSQL, SQLite, REST APIs, WebSockets, MCP, JSON/JSONL.

Market-data analysis: Pandas, NumPy, time-series replay, execution simulation, trade reconciliation.

Financial markets: Futures, order-flow analysis, technical and fundamental analysis.

Engineering: Git, Docker, GitHub Actions, automated tests, debugging and documentation.

SELECTED PROJECTS

Energy Monitor: Built a public monitor that lines up European day-ahead electricity prices with generation for the same delivery periods. Its catalogue lists generation feeds for 33 countries/territories and connected prices for 21 zones across 16 countries. Missing or delayed readings stay visible; the comparison is not a price forecast.

Polybow: Operated a Python trading bot on AWS Lightsail; compared order and account records to investigate mismatches and document failures. Live trading stopped; not evidence of durable profitability.

Pattern Forge: Built an interactive market chart with candle-pattern detection and historical replay. Added a Python/PostgreSQL ingestion path and tests that prevent later prices from changing an earlier reading.

EXPERIENCE

De Bommel | E-commerce dispatch · Ceyenne WMS and DHL | 2025-2026

- Handled 700+ furniture orders a day in the Ceyenne WMS; booked inbound trucks, checked documents and prepared DHL dispatch.

- Separately, used Python and SQL to compare order lines with dispatch records; this did not modify the WMS.

IAS Handling | Inbound Manager Assistant · Barcelona-El Prat Airport | 2019-2023

- Supported inbound cargo handling at a bonded warehouse, checking customs documentation and shipment records.

Transjunior Logistics | Team Leader · warehouse operations · WMS | 2018

- Led warehouse shifts: order processing, rotating stock and inventory in the WMS.

Home Fundraiser Ltd, London | Planner | 2016-2017

- Planned daily routes and field-team assignments with the team leader.

Amplify Trading | Futures trading · Gold and Dow Jones | 2016

- Traded Gold and Dow Jones futures on an Amplify live account, reading order flow against technical and fundamental views.

EDUCATION & TRAINING

Le Wagon, Barcelona | Full-stack development | 2023

Ruby, Rails, JavaScript, PostgreSQL, HTML/CSS and Git.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016. Futures, markets and applied finance.
