SKILLS

Languages

Python, SQL,

TypeScript, JavaScript

Data & integration

PostgreSQL, SQLite,

REST APIs, WebSockets,

MCP, JSON/JSONL

Market-data analysis

Pandas, NumPy, time-series

replay, execution simulation,

trade reconciliation

Financial markets

Gold and Dow Jones futures,

order-flow analysis,

technical and fundamental analysis

Engineering

Git, Docker, GitHub Actions,

automated tests, debugging,

documentation

LANGUAGES

Spanish - Native

English - C2

Catalan - B1

Dutch - A1

Data Software | Pipelines & Analysis

I build tools that turn inconsistent source records into data people can inspect. Projects cover energy feeds, time-series replay and order reconciliation, with checks for missing records and mismatched timestamps. My background includes futures trading and logistics.

SELECTED PROJECTS

Energy Monitor

Built a public monitor that lines up European day-ahead electricity prices with generation for the same delivery periods. Its catalogue lists generation feeds for 33 countries/territories and connected prices for 21 zones across 16 countries. Missing or delayed readings stay visible; the comparison is not a price forecast.

Polybow

Operated a Python trading bot on AWS Lightsail; compared order and account records to investigate mismatches and document failures. Live trading stopped; not evidence of durable profitability.

Pattern Forge

Built an interactive market chart with candle-pattern detection and historical replay. Added a Python/PostgreSQL ingestion path and tests that prevent later prices from changing an earlier reading.

EXPERIENCE

De Bommel

E-commerce dispatch · Ceyenne WMS and DHL | 2025-2026

- Handled 700+ furniture orders a day in the Ceyenne WMS; booked inbound trucks, checked documents and prepared DHL dispatch.

- Separately, used Python and SQL to compare order lines with dispatch records; this did not modify the WMS.

IAS Handling

Inbound Manager Assistant · Barcelona-El Prat Airport | 2019-2023

- Supported inbound cargo handling at a bonded warehouse, checking customs documentation and shipment records.

Transjunior Logistics

Team Leader · warehouse operations · WMS | 2018

- Led warehouse shifts: order processing, rotating stock and inventory in the WMS.

Home Fundraiser Ltd, London

Planner | 2016-2017

- Planned daily routes and field-team assignments with the team leader.

Amplify Trading

Futures trading · Gold and Dow Jones | 2016

- Traded Gold and Dow Jones futures on an Amplify live account, reading order flow against technical and fundamental views.

EDUCATION & TRAINING

Le Wagon, Barcelona | Full-stack development | 2023

Ruby, Rails, JavaScript, PostgreSQL, HTML/CSS and Git.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016. Futures, markets and applied finance.
