EU citizen - no sponsorship needed in the EU

Portfolio: coder058.github.io/profile | GitHub: github.com/coder058

I build and test software for checking records, researching information and inspecting market data. My projects connect APIs, store validated records and make failures visible. Earlier work in dispatch and cargo operations informs the practical problems I choose to solve.

SKILLS

Languages: Python, SQL, TypeScript, JavaScript.

Data and integration: PostgreSQL, SQLite, REST APIs, WebSockets, MCP, JSON/JSONL.

Engineering: Git, Docker, GitHub Actions, automated tests, debugging and documentation.

Applications: FastAPI, React, Next.js; Ruby on Rails (project work).

SELECTED PROJECTS

Pattern Forge: Built an interactive market chart with candle-pattern detection and historical replay. Added a Python/PostgreSQL ingestion path and tests that prevent later prices from changing an earlier reading.

Polybow: Operated a Python trading bot on AWS Lightsail; compared order and account records to investigate mismatches and document failures. Live trading stopped; not evidence of durable profitability.

Info Desk: Built a Python research tool that connects AI drafts to source passages and requires human approval before saving a write. Tested citation checks and source retrieval. Live research runs locally; the public case is recorded.

EXPERIENCE

De Bommel | E-commerce dispatch · Ceyenne WMS and DHL | 2025-2026

- Handled 700+ furniture orders a day in the Ceyenne WMS; booked inbound trucks, checked documents and prepared DHL dispatch.

- Separately, used Python and SQL to compare order lines with dispatch records; this did not modify the WMS.

IAS Handling | Inbound Manager Assistant · Barcelona-El Prat Airport | 2019-2023

- Supported inbound cargo handling at a bonded warehouse, checking customs documentation and shipment records.

Transjunior Logistics | Team Leader · warehouse operations · WMS | 2018

- Led warehouse shifts: order processing, rotating stock and inventory in the WMS.

Home Fundraiser Ltd, London | Planner | 2016-2017

- Planned daily routes and field-team assignments with the team leader.

Amplify Trading | Futures trading · Gold and Dow Jones | 2016

- Traded Gold and Dow Jones futures on an Amplify live account, reading order flow against technical and fundamental views.

EDUCATION & TRAINING

Le Wagon, Barcelona | Full-stack development | 2023

Ruby, Rails, JavaScript, PostgreSQL, HTML/CSS and Git.

Amplify Trading | Level 6 Diploma in Applied Finance

Distinction | June 2016. Futures, markets and applied finance.
